

GIS CENTER

SM 208, (507) 537-6371

The Geographic Information Systems (<https://www.smsu.edu/campuslife/geographicinformationsystems/>) (GIS) Center was established in 1999, and houses a network of computers and related equipment to serve the growing number of GIS users, both public and private in Southwest Minnesota. The Center is available for use by students and faculty as part of regularly scheduled classes. Additionally, as a regional resource in Southwest Minnesota, the Center is available for area residents to house data of significance and to provide technical support through consultation, customized applications, and workshops.
